

JUST WHAT THE CISO DELIVERS

Is your security leadership providing what's demanded by today's threat landscape?

Manages Security Operations

Monitors threats in real time. Discovers, assesses, and corrects security gaps and issues.

Analyzes Cyber Risk

Stays ahead of potential security risks, including prior to deals, mergers, and acquisitions.

Prevents Fraud + Data Loss

Keeps critical data secure from both internal and external threats.

Optimizes Security Architecture + Program Management

Optimizes security teams, tools, technology, and processes—managing, adding, and evolving as needed.

Heads Access Management

Manages credentials, logins, passwords and other encrypted info, including who has access to what.

Takes Point on Investigations

Works with law enforcement and government agencies should a security incident occur.

Oversees Governance

Ensures program meets compliance requirements, avoiding hefty fines or penalties.

Communicates with the Board

Represents security with executive leadership.

If any of these categories have significant room for improvement, consider bolstering your leadership team with **CISO as a Service**. Our experienced security leaders support your organization where needed, upleveling your existing team as well as your security posture.
